JEWELRY SHOWCASES

Wood veneers are available with a variety of stain finishes. Sample chips of wood veneers with different stains can be sent to you for your examination. Should you wish to order a showcase with a custom laminate, all we need is the name of the manufacturer and the item number.

The showcases may be equipped with pull-out decks for easier jewelry placement, presentation and removal. The storage in the jewelry case's cabinets may be with sliding doors or hinged doors. Options such as locking drawers, file drawers, and/or pencil drawers can be added to the showcases. The configuration of our cash wrap may include a pull-out keyboard tray, a section for your cash register or computer. Based on your functional needs we can practically design your cash wrap.

Our jewelry cases feature locking sliding door or hinged door storage. Our goal is to make the new fixturing or remodeling of your store as efficient, smooth and detailed as possible. Following this process you may use our standard jewelry showcases or modify them and/or add some custom cases.

Upon submission of your showroom floor plan CUSTOM DISPLAY GROUP will assist you in the development of a showcase layout that fits your space, your image, selling needs and budget. You will have on paper exactly what the showcases will look like in your future store together with sizing and dimensions. As you can see on our website slide show we are able to work on a wide variety of projects, on many various looks, showroom sizes, and cabinet materials. All photos on our slide show represent projects completed recently and are updated constantly as a source of references. All our showcases can be manufactured using standard or custom laminates or solid wood/veneers. We are supplying a high quality finish on all our solid wood cases and can also match any finish you wish. Finish prototypes will be produced first for your examination and when approved production of your cabinets will start.

TROPHY CASES

Our selection of trophy cases includes different shapes and sizes of fully pre-assembled glass display cases. They are available in different types of laminates, solid wood veneers, and, at your request, various patterns of decorative moldings can be mounted on the face cabinets of our trophy cases.

Crowns can also be added on the top canopy of the trophy cases. Built with a quality construction, they can accommodate any kind of reward items or memorabilia, from award plaques to football display cases or metal trophies. You may want to consider adding glass shelves for this purpose. Additionally, most of our wall display cases or pedestals can be supplied with a solid back should it be wood or fabric covered. Safe, reliable and easy to use locking systems are standard.

CUSTOM DISPLAY GROUP can supply trophy display cases with a classical feeling as well as modern, colorful, and distinctive look. Please check with our customer service for all the enhancements available on our ranges of glass tower cases, wall showcases, and countertops, etc.

Our well designed trophy cases will help you maximize the usage of your floor selling space. Contact us with your questions and store fixturing needs. We can also design, conceptualize, and manufacture custom glass trophy cases in many different shapes, sizes, and materials.

TOWER SHOWCASES

Our Tower Display Cases are all free standing and available in different shapes and sizes: tower Cases, hexagonal towers, square cases, rectangular showcases. Pre-assembled, easy to use, with fully adjustable shelves and halogen lighting they will accommodate multiple purposes such as a giftware case, collectibles display showcase, dolls display case, die cast car model showcase just to name a few.

As a retail display case they will allow you to organize, categorize your items effectively using a limited amount of space. Our store fixtures can be installed, ready to use in minutes and are all glass. The glass display showcases can be customized as museum Tower Cases, to showcase sports memorabilia, cosmetic products, pens, coins and various types of glass or crystal items and collectibles.

Our display showcases are also widely utilized by the optical industry to display frames and accessories and by camera stores to showcase lenses and photographic equipment. CUSTOM DISPLAY GROUP will help you in the selection of the right cabinet finish for your retail store environment. Because of the quality of construction of our Tower Cases they can be easily used as trade show displays.

You may want to contact us with your specific needs. Our new state of the art manufacturing facility is highly productive and we can supply all kinds of projects within an accurate and reasonable period of time, should it be a single towers or a quantity of promotional Tower Cases. Please contact us for your needs and projects.

WALL SHOWCASES

Our selection of wall showcases includes different shapes and sizes of fully pre-assembled glass display cases. They are available in different types of laminates, solid wood veneers, and, at your request, various patterns of decorative moldings can be mounted on the face cabinets of our wall showcases. Crowns can also be added on the top canopy of the display cases.

They are ideal as a giftware case, collectible case, jewelry display, memorabilia showcase or as a doll display etc... Most of CUSTOM DISPLAY GROUP wall showcases can be customized, such as modifying the overall height, depth, width or changing the sizes of the cabinets or glass area, as well as adding more shelves to the wall unit. They are featured as museum glass showcases in institutions all over the U.S.

All our wall showcases have adjustable shelves, are lockable and on casters, thus easy and practical to use as retail display cases. From a single store fixture to a whole store configuration our display cases will keep your merchandise clean, safe, organized and attractive. Our well designed wall showcases will help you maximize the usage of your floor selling space. Contact us with your questions and store fixturing needs.

COUNTERTOP SHOWCASES

Our range of display cases includes countertop display cases and are available in square, rectangular and hexagonal shapes. They are all glass cases ideal as a jewelry display, small collectible showcase, giftware display or a memorabilia trophy case.

Compact, attractive and quality built our counter displays can be easily used as portable display cases or installed on top of a glass jewelry showcase to highlight products and place them at eye level. Another alternative is to place them on the top and on one side of your cashwrap counter thus putting you in a favorable position to close on these last minute purchases.

All our counter cases are lockable with fully adjustable glass shelves and top halogen lighting to enhance the look and perceived value of their contents.

Countertop cases are available standard and also can be custom made. Modification of the overall width, depth, height of the countertop case can easily be completed in our manufacturing facility. Also increase or decrease of the height of the glass area can be made.

WALL SHADOW BOXES

Shadow display boxes are the one way to make your products highly visible, right in front of the viewer and to put to some good use your available wall space.

Shadow boxes can be hung or recessed into a wall. They are fully assembled and ready to install. CUSTOM DISPLAY GROUP will manufacture them in the size you need. Just give us the width, height and depth requested: from very narrow to very high and from very wide to very short.

Standard shadow boxes have lockable sliding doors with a plunger lock. Small size shadow boxes can be made with hinged doors. For structural purposes hinged doors should not exceed twenty inches in width. They are equipped with fifty watts halogen top lights spaced twelve inches apart. Vertical side track lighting can be installed with corresponding spotlighted. This may be suitable for tall and narrow boxes. The shelves are fully adjustable. The back and/or deck of a shadow box can be mirrored or solid wood, laminated. For your information shadow boxes can be made with solid wood sides or glass sides. Should you wish to recess your box into a wall we can build a frame molding around the box to mask the connection between wall and box and to enhance the overall look of your display. Shadow boxes are ideal to display jewelry, collectibles, museum artwork, and general giftware. They also can be manufactured with a top in glass and possible glass sides. You may choose to add more glass adjustable shelves than the standard number for your cabinet. The deck of your shadow box may be mirrored or laminated. Our new additions include shadow boxes with a curved front cabinet.

OPTICAL SHOWCASES

CUSTOM DISPLAY GROUP is manufacturing a collection of glass modular optical showcases. We offer dispensing tables, top-in-glass pedestals, wall showcases and freestanding towers.

All are pre-assembled glass showcases and are lockable. As CUSTOM DISPLAY GROUP is a leading producer of glass towers and wall showcases for all industries, many of CUSTOM DISPLAY GROUP existing models can be readily supplied to the optical industry. In addition, a whole series of wall-hung shadow boxes and cabinets is now available in various sizes, configurations and finishes. All of them are equipped with metal rods and frame holders.

Different sizes of wall shadow boxes will accommodate from a small to a large number of frame holders. Because of the various sizes available, they fit singly or together in most of the wall sections you are planning to fixture. Wall shadow boxes are available open or totally enclosed and supplied with glass sliding doors, and a plunger lock, thus making them totally secure.

The quality of our craftsmanship and our modern manufacturing facility allows us to offer our optical cabinets in many different laminates and finishes, thus complementing the existing look of your store.

Storage with shelves in the base cabinets, in as well as adjustable glass shelves and halogen lighting are regular features in our cases.

MUSEUM SHOWCASES

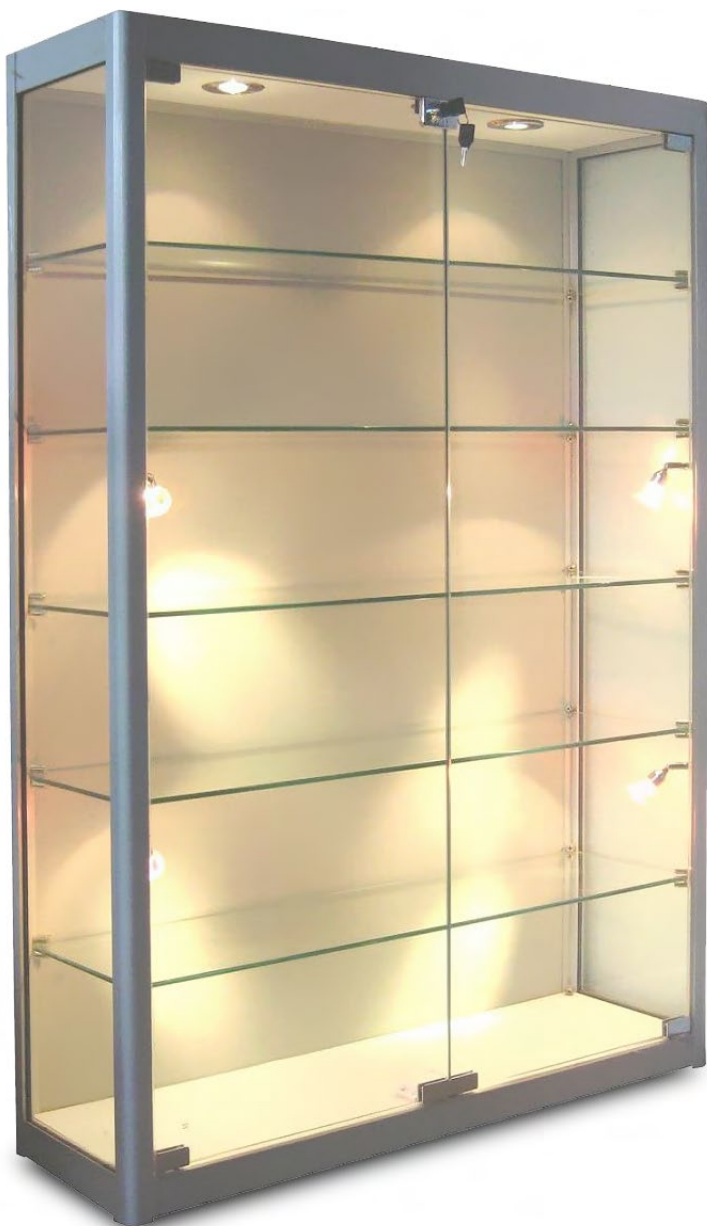

CUSTOM DISPLAY GROUP is manufacturing a varied selection of museum glass display showcases. It includes wall display cases, free standing towers and wood pedestals.

Our vitrine pedestals are of two kinds: with a solid wood cabinet below the glass area or with wooden standing legs supporting the glass exhibit portion. Our museum cases are generally made of solid wood with veneers and then stained.

Some of our wood pedestals have slide out decks for elegant displaying and easy handling of the objects or artifacts to be featured. All our museum glass cases are pre-assembled, glass and fully lockable. Our seamless glass to glass construction on the wood pedestals allows for a full, clear and direct vision of the item displayed. All the shelves in our wall display cases are glass and fully adjustable.

Accent moldings such as single moldings and flute moldings are applied to the front face of the cabinets in different patterns. CUSTOM DISPLAY GROUP only uses the finest hardware in the building of its cabinetry.

From simple recessed moldings to elaborate and decorative moldings our modern and experienced cabinet shop can supply you with the look and quality you are expecting. As a growing display showcase and store fixtures manufacturer CUSTOM DISPLAY GROUP is constantly studying and designing new cases.

PEDESTALS SHOWCASES

CUSTOM DISPLAY GROUP is manufacturing a full range of Pedestal display cabinets. They can be divided into two categories:

Our basic laminated Pedestals used to display and highlight giftware, artwork, sculpture, collectibles, or possibly toys. These Pedestals are available in various heights depths, and widths, and can be used individually or grouped together in different areas of the center of your retail space. Pedestals are good for prominently showing «new arrival» items that you want your customers to spot right away or, as a group, Pedestals can show the different best sellers of a new line of toys, artwork, or collectibles, for example.

The second category is solid wood Pedestals whose surface and look is most often more luxurious and detailed with moldings, etc....You will find them in art galleries, museums, higher end gift or collectible stores, and museum gift shops. The wood finish on these Pedestals will bring a warm, exclusive and unique glow to the retail space or exhibit area. In this case, the wood Pedestal serves to make the object it supports stand out.

CASH WRAPS

We are manufacturing different designs of cash counter wraps for the retail industry and commercial space. They are produced as individual units to be utilized by themselves or as part of larger configurations of many showcases.

They are delivered fully assembled and available in a wide variety of laminates and solid wood veneers. We can supply linear straight designs, angled units and various radius of curved cash wraps. Depending on your needs they may be equipped with a check writing area, a computer key board roll out tray, some open shelving, hinged door(s), drawers, sliding doors, recessed space.

Following your instructions we can also drill the holes necessary for your wiring. With attention to your every day needs we will manufacture a practical cash wrap that fits your look.

Budget Showcases

VECC200-2
24"x42"x20" From \$775

- Levelers
- Open storage with two shelves
- Available in various sizes, colors or finishes
- Available with Various LED lighting options

VECC201-4
48"x42"x20" From \$1120

- Levelers
- Open storage with two shelves
- Locking hinged door
- Available in various sizes, colors or finishes
- Available with Various LED lighting options

VEGL119
40"x73"x14" From \$1115

- Levelers
- 4 adjustable thick glass shelves
- 2 locking hinged doors
- Available in various sizes, colors or finishes
- Available with Various LED lighting options

VEC17
48"x36"x14" From \$1440

- 6 adjustable thick glass shelves
- 2 sets locking sliding doors
- Available in various sizes, colors or finishes
- Available with Various LED lighting options

VEC18
48"x48"x14" From \$1735

- 8 adjustable thick glass shelves
- 2 sets locking sliding doors
- Available in various sizes, colors or finishes
- Available with Various LED lighting options

VEC19
60"x36"x14" From \$1560

- 6 adjustable thick glass shelves
- 2 sets locking sliding doors
- Available in various sizes, colors or finishes
- Available with Various LED lighting options

SHAPES & COMBINATIONS

All of our showcases can be built in different shapes and configurations so that with a variety of cases you can design your own layouts. These layouts can be custom made for various concepts such as: a store layout, an open kiosk, concept for a new product (line) launch for a tradeshow and many other retail and museum layouts.

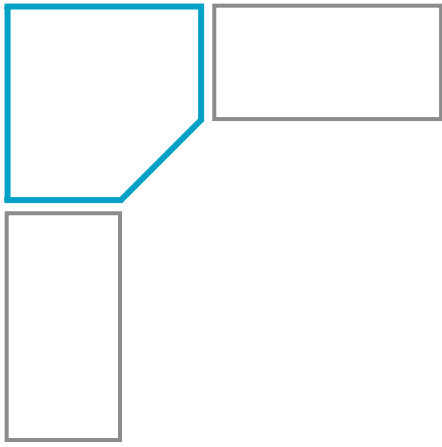

With shapes and combinations you can create several configurations with the same cases or get a completely different look when you use another shape with our showcases. This is ideal for dynamic retail environments or when used for exhibitions.

The illustrations on the right are the representation of some of the shapes that can be used to create a specific layout. The blue lines represent the 'shapes' and the grey can be any of the standard showcases that you can find in this catalog.

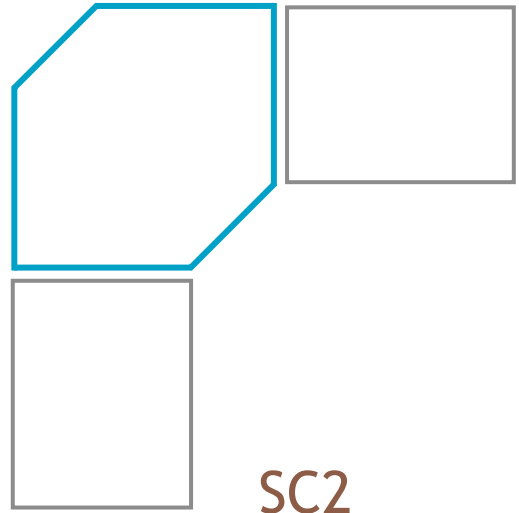

Note: The frame of the SC-Series is made out of large extrusion and the SMC-Series frames are made out of the small extrusion. For more information about shapes and combinations please contact us directly.

MATERIALS & FINISHES

In order to make the top quality showcases, you need to use the best materials available today. We constantly source new materials, parts and finishes on a daily basis to keep up with the fast changing industries. These new innovations are after testing, quickly adopted into our manufacturing process. Next to our own research, we work together with suppliers that share our passion for quality and innovation. CUSTOM DISPLAY GROUP has with most of these suppliers a working relationship for over 20 years. CUSTOM DISPLAY GROUP is very flexible when it comes to work with certain requirements. Tell us if you already have materials that you would like to use in your display, kiosk or cart. Chances are that we already know it, but if we don't, we do like a challenge.

Aluminium

All of our extrusions are made of a high quality tempered aluminium alloy called 6063-T5. With our extrusion system we are able to build rectangular and angular displays with 45 and 60 degree corners.

Aluminium properties:

- Naturally resists corrosion, even more with anodic coating
- Readily available and cheaper than steel
- Best strength-to-weight ratio of any metal
- Wide range of finishes available
- 100% recyclable

Custom Aluminium Options

Among the available finishes are: powder coatings (any color) and anodized with optional textures.

Glass

Glass will allow your displayed items to be viewed while restricting access to them. It will also give the display a more exclusive look, combined with excellent lighting that will create a sparkling effect. This will attract more costumers to your display.

Custom Glass Options

- Glass shelves may be as thick as 25mm
- For display glass inserts (sides, tops, backs, etc.) we use clear float glass with flat polished edges. All glass inserts are also available tempered for safety reason.
- Coloured glass is available in all thicknesses as well, colour matched and various finishes (opaque, translucent, metallic, pearl)
- Low-iron Star-fire glass is available in thicknesses up to 19mm. This glass greatly reduces the green tint seen in normal float glass
- Other glass products are available such as mirror, laminated and patterned glass

Substrates

Our extrusion system allows us to use any substrate available on the market. Therefore we are able to work with any supplier of melamine and laminate which gives us freedom to create exactly the custom design you are looking for. We can process any of the following types of substrates:

- Particle board/melamine
- MDF
- Plywood
- Acrylics/plastics
- Engineered materials (honeycombed plastics or aluminium)
- Solid wood
- Glass & mirror

Custom Substrate Options:

Choose any of the thousands of finishes available on the market.

Fabrics

We use high quality fabrics in our cases for several purposes such as: finish options for corkboard panels, jewelry beds etc.

Custom Fabric Options:

For other applications please consult our designers.

Graphics

There is nothing more important for your brand than good exposure to your customers. Therefore we have all the resources necessary to incorporate your branding into the custom design. We can print all the graphics ourselves or, if desired, you just send us your graphics and we will apply it to the product.

Custom Graphic Options:

We can print any of your graphics in vinyl colours, full colour Dura-trans and apply it on backlit signage, flip-frames for easy changing graphics and of course on the glass and substrates.

Plastics

We use plastics for several purposes in your system. The types of plastics we use are vinyls and acrylics that are used for of glass battens, door channels and other parts. We also use plastics for signage, backlighting and display case panels. We work with several suppliers that can supply us with any custom solutions such as display item stands and other product specific requirements.

Custom Plastics Options:

We can print any of your graphics in vinyl colours, full colour Dura-trans and apply it on backlit signage, flip-frames for easy changing graphics and of course on the glass and substrates.

LIGHTING SOLUTIONS

At CUSTOM DISPLAY GROUP we spend more of our research and development time in lighting than any other aspect of our products. This is partly because of the importance of lighting in quality display, but also because the lighting industry is rapidly changing. Many lighting technologies have come and gone, and we have worked with all of them, including technologies such as fiber optic and holographic.

Sometimes it is important to think outside of the box when it comes to lighting, especially in museum and other exclusive applications. Most lighting solutions answer three needs; color of light, intensity, and coverage. Further concerns include longevity, availability, temperature, energy consumption, and ease of use.

The unfortunate news is that cheap is almost always bad in lighting. The good news is that there are options. In this chapter we will describe some of the advantages and disadvantages of the two most commonly used lighting types; fluorescent and light emitting diodes (LED).

How to use lighting in your showcase depends on what you need to display. You can light from the top down, bottom up, or from the sides. You can also use a combination, which often gives a better result. The extrusion profiles of our cases allow us to hide the wiring for a cleaner look. Light bars can be made in any length, and we can help you figure out how much light you need. We are confident that we have the best lighting solutions available.

Custom Lighting Options:

Lighting solutions can be based on special requirements such as:

- Lighting colour temperatures (Kelvin Scale)
- Intensity, amount of light output
- Flood or spotlight
- No UV emissions (that can damage certain materials)
- Reduced heat output
- High efficiency, low energy consumption

We use various different types of fixtures depending on the lighting requirements of the display:

- Recessed down lighting
- Sidelights for illuminating shelves or providing spotlights
- Backlighting for graphics
- Illuminated panels, white or coloured for visual presentation
- Light bars for counters

LED Light Fixtures

LED technology has been developing at a staggering rate and is now of equal, or even in some cases higher performance than conventional lighting. Because of the great leap in technology we now have selected LED as our standard lighting solution.

LED advantages:

- Life span between 50,000 to 100,000 hours
- Durable, they have no filament, are very resistant to impact or shock
- Very energy efficient, 80% of energy is converted to lighting
- Very little heat output
- No UV radiation
- Very high watt to lumen ratio

Disadvantages:

- Higher initial cost compared to existing conventional technologies
- Lower light output

Fluorescent Light Fixtures

Fluorescent advantages:

- Up to 66% cheaper than incandescent lighting providing the same amount of light
- Lasts six times longer than incandescent
- Little heat output

Disadvantages:

- Higher initial cost
- Light tube may flicker near the end of its life
- Mercury content

For all custom options see pages 58 to 63

LOCKS & SECURITY

If it were not for the need for security, there would be no glass cabinets. Therefore, high quality locks are standard in all our showcases. Regular locking mechanisms need to be easy to use, easy to maintain, and they need to make the case relatively tamper resistant.

Keeping out professional thieves requires more complicated and expensive measures, and these are typically used in museum applications. Some high security features may include: locks with unique key number registred to the client, security film applied to the glass interior (to prevent smash and grabs), and electric monitoring.

AMMA Lock Hardware provides us with the standard locks that we use in all displays unless specified otherwise. To satisfy special security concerns or specifications, we may also provide locks from any manufacturer, includig Kenstan and Abloy.

Please contact our design team to discuss all your concerns regarding security.

Depending on the manufacturer, different options may be available:

- Varios finishes and colours
- Key control (registered key numbers, specific to store or department)
- Controlled duplication of key numbers
- Key retaining vs. non-key retaining (key retaining locks prevent the key from being removed unless the lock is engaged)
- Resistance to attack (increased resistance to drilling and picking)
- Electronic key systems for monitoring display cases access

SHIPPING & CRATTING

For CUSTOM DISPLAY GROUP the commitment to customer satisfaction does not end when the products leave our facility. With over 25 years of experience in shipping our products across the continent, we have shipped everywhere in North America and even as far away as the Alaska, Newfoundland, The Caribbean and Hawaii. We ship using either our own trucks or our trusted shipping partners. It is our intention to deliver your shipment in perfect condition.

Most of our products are shipped in crates that we construct in-house. Our methods have improved over time, and we have found an excellent way to crate our showcases. We achieve this by showing most of the product while it is crated. This lets all people who handle the freight know that they are handling glass product. It also allows receivers to see if the product is damaged before they sign for the shipment. Want to know the shipping charges before you buy our products? Please contact our logistics team to provide you with an estimate.
